Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. CSE	Indian Institute of Information Technology, Design and Manufacturing Kancheepuram	9.2	2022-2026
Senior Secondary	CBSE Board	94.8%	2021
High School	CBSE Board	95.2%	2019

Projects

- **Personal Portfolio** *Jan. 2024 - Ongoing*
  Web Development Website
  - Developed and launched a personal portfolio website to showcase my skills, projects, achievements and ideas
  - Utilized HTML and CSS to design and code a visually appealing and responsive website that effectively highlighted my professional background.
- **Chatbot using Fine-tuned BERT Model** *May. 2024 - July. 2024*
  Internship
  - Developed a chatbot by fine-tuning a BERT model from the Transformers library using Python, showcasing advanced machine learning and natural language processing skills.
  - Created and curated a custom dataset for fine-tuning the model, demonstrating data preparation and expertise
  - Integrated the fine-tuned model into a server to handle requests and serve responses via an API, enabling seamless interaction for users.
  - Implemented robust API endpoints to ensure efficient communication between the chatbot and client applications.
- **Club Management and Student Achievement Tracking System (CMSATS)** *April. 2024 - May. 2024*
  Web Development Github
  - Designed and implemented a comprehensive Club Management and Student Achievement Tracking System using HTML, CSS, and JavaScript for the frontend, showcasing web development skills.
  - Developed backend functionalities using PHP, managing user interactions and server-side logic, highlighting proficiency in server-side scripting.
  - Integrated a database system to store and manage records of users, events, projects, leads, and members, demonstrating database management skills.
  - Implemented secure login and authentication mechanisms to ensure user data protection, showcasing attention to security best practices.
  - Utilized version control with Git, ensuring efficient code management, collaboration, and deployment.
  - Integrated role-based access control to manage permissions and access levels for different types of users, enhancing system security and functionality.
  - Integrated automated mailing system for notifications and updates, streamlining communication with users.
  - Developed automated certification generation feature, allowing for efficient creation and distribution of certificates for participants.

Skills

- **Programming**: Python, C/C++, MySQL, Java*, NodeJS, Express JS, Leetcode CodeChef
- **Web Development**: HTML, CSS, JavaScript, PHP
- **Tools/Frameworks**: Autocad, Matplotlib, OOPs, BeautifulSoup, Selenium, Pygame, MS Office, Latex*, Tkinter
- **Operating Systems**: Windows, Linux*
- **Non Technical**: Leadership, Problem Solving, Coordination, Critical Thinking, Creativity

** Elementary proficiency*

Key courses taken

- **Computer Science**: PSP, DSA, DAA, OS, COA, System Design, DBMS, Data Science
- **Mathematics**: Linear Algebra, Calculus, Discrete Maths, Probability & Statistics
- **Humanities & Management**: Effective Language and Communication Skills , Earth Environment and Design, Indian Constitution, Essence of Indian Traditional Knowledge

Achievements

- **Best Idea**, Bal Vigyan organised by Indore Sahodaya Schools Complex *2018*
- **JEE Mains 2022**, Secured **98.2 Percentile** among 1.2 million candidates appearing for the test *2021*
- **Competitve Programming**, Leetcode Biweekly 120, Secured a rank of 5540 among 23900 candidates *2023*
- **Competitve Programming**, Codechef Starters 104 Div. 4, Secured a rank of 984 among 15827 candidates *2023*
